--> Comment Text :  
While neither a scientist nor an engineer I have worked in a job where I consider nuclear safety questions on a routine basis. I have read extensively about the Yucca mountain site including the report referenced on this web page.

I have also toured Yucca mountain both inside and to the top. This tour gave me and others of my party an opportunity to ask many questions.

I believe this site will be an excellent solution for High level waste. I will say I am astounded at concerns regarding highly level waste when we are exposed daily to so many hazards that could actually be made safer.

I will support this site whenever and wherever I can.
